Dr. Malgorzata Klimek studied at the Technical University of Wroclaw and obtained M.Sc. in Mathematics in 1981. The Ph.D. degree in Mathematical Physics, Malgorzata Klimek received in 1993 from the Institute of Theoretical Physics of Wroclaw University. Then she earned the Habilitation in 2003 at the Wroclaw University.

Currently she is an associate professor at the Institute of Mathematics-Czestochowa University of Technology. She serves also as Chair of the Department of Industrial Mathematics. Malgorzata Klimek conducts lectures and seminars in various fields of pure and applied mathematics. Her scientific interests include global and differential conservation laws for models on non-commutative and discrete spaces, fractional mechanics and theory of fractional differential equations. She published over 50 research papers in international journals and conferences and authored one book "On Solutions of Linear Fractional Differential Equations of a Variational Type" (2009).
